

SKINIAL

COSMETIC & CARE

FOR THE REGENERATION OF THE SKIN DEVELOPED FOR TATTOO AND PMU CORRECTION AND REMOVAL

1) Dermatological balance, anti-scarring

2) Skin Repair Long-term care

1 Scar Care Cream has been developed to restore balance to chapped and irritated skin, while its antibacterial effect reduces the risk of infection. The practical airless dispenser makes it easier to dispense even the smallest doses with accuracy and does not dry out.

Application:

Apply Scar Care Cream product at least twice a day to the affected areas once the crust has fallen and the wound has closed, massaging it gently to encourage absorption. The formation of the crust is necessary for the ink removal and must not be disturbed. If the wound has closed following treatment with CoverX, only apply Scar Care Cream once the CoverX layer is no longer present. Apply Cover X 30 minutes after applying ScarCareCream.

SKINIAL SCAR CARE CREAM

Content : 5 ml/30 ml

2 Skin Repair Gel with high active ingredient content extensively supports the healing process for skin injuries and damage caused by wounds or external friction and nourishes the skin.

Application:

Apply Skin Repair Gel Cream product twice a day to the affected areas once the wound has closed, massaging it gently to encourage absorption.

SKINIAL SKIN REPAIR GEL

Content : 50 ml

- 3** H2O Mediclean product is a new type of skin hygiene spray. It reduces pathogens, and fertile microorganisms (including viruses and bacteria).

Application:

After a pigment applying procedure (tattooing, PMU) or pigment removal (tattoo or PMU removal), spray H2O Mediclean on the treated skin surface and let it sit for at least 60 seconds. The product must not be wiped off.

H2O MEDICLEAN

Content : 50 ml

- 4** CoverX acts as an artificial skin and spreads over the skin area to be protected. The product exists in “clear” (transparent) for applications after a tattoo or pmu treatment. It protects the skin area from dirt and splash. In “skin tone” (skin color) it also protects from UV rays. The airless dispenser protects the product against drying out.

Application:

Apply CoverX product to the affected area once the crust has fallen off. It dries quickly and it is extensively applicable. It falls off after 2-4 days.

CoverX

Content : 10 ml. Available in clear and skin tone.

3) Against pathogens and proliferative microorganisms

4) Protection against UV rays and friction
